The Vital Importance of

Our "Concave" Shoulder and "Closefitting" Collar.

Nothing will so mar the lines or the fit of a garment as a poorly-made, drooping shoulder. Without a perfect shoulder the result is an imperfect coat. The solution of the problem lies in our "Concave" Shoulder. It is the pivotal point upon which the successful fit and balance of our coats turn.

The "Concave" Shoulder is our own invention; its basic principle is at a direct tangent to that which governs in usual ready-to-wear clothes. It is modelled and shaped by hand and gives the desired height and breadth without exaggeration, at the same time eliminating all superfluous wadding. It is incorporated together with our "Closefitting" Collar in all of our

We respectfully call the attention of fathers and mothers when purchasing Castoria to see that the wrapper bear his signature in black. When the wrapper is removed the same signature at pears on both sides of the bottle in red. Parents who have used Castoria for their little ones in the past years need no warning against counterfeits an imitations, but our present duty is to call the attention of the younger generation to the great danger of introducing into their families spurious medicine. It is to be regretted that there are people who are now engaged in the nefarious business of putting up and selling all sorts of substitutes, or we should more properly be termed counterfeits, for medicinal preparations no only for adults, but worse yet, for children's medicines.
